

OYSTER MUSHROOM HOME KIT (2L)

Download this guide here:

YOU WILL NEED

Spray bottle & clean water (not included)

Light cloth (included)

INCUBATION PHASE

Keep in the dark (in a drawer or covered)
Do not open | No need to spray

7~14 days

(skip this step if substrate is all white already)

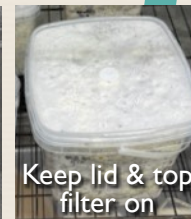

FRUITING PHASE

Once the tub is all white with mycelium, take off the side round filter patches and place in a well ventilated space with indirect daylight

side filters off

Keep lid & top filter on

Take off *only* the side filter patches. Do not open the top lid or the filter patch on the top.

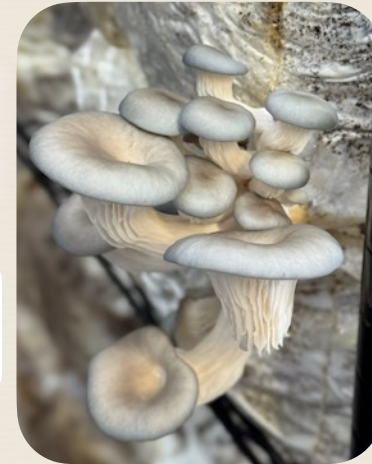

Spray 2-3 times a day on the opened area to keep moist

7~14 DAYS

When pins (small mushrooms) are seen, spray only around the mushrooms, not directly on them

Use the included cloth to keep the surrounding area moist as necessary

3-4 DAYS

Mushrooms will be mature after 3-4 days. Harvest all mushrooms in one go, big or small.

After harvest, clean off any mushroom residue at the base - it will regenerate every 2 weeks for several fruitings if you look after them well!

HARVESTING & COOKING

Harvest when caps are almost upturned

Pull from the bottom of the stem, it should come off cleanly with a bit of substrate attached

Store as is (no need to trim) in a breathable container with lid on for best storage. Keeps fresh for a week.

Oyster mushrooms have a nutty, earthy flavour and a crunchy texture.

They release umami compounds when heated, and are best sautéed in butter, stir-fried, roasted, or tempura-ed.

BULGOGI MUSHROOM NOODLES

1. Shred mushrooms with hand into smaller pieces and marinate in bulgogi sauce
2. Prepare shredded vegetables such as carrots, cucumber, and bean sprouts
3. Fry beaten eggs with herbs such as basil and rosemary, season well and chop into cubes
4. Fry mushrooms in pan, add water to release any sticking, add herbs such as thyme and basil
5. Make your favourite dry noodles, top with the mushrooms, eggs, vegetables, and serve with kimchi

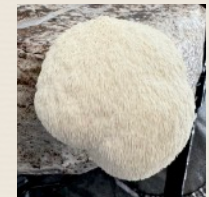

THE ULTIMATE SUPERFOOD

- Mushrooms are high in protein, low in fat, rich in fibre, and provide all of your essential amino acids
- Packed with antioxidants and polysaccharides e.g. beta-glucan;
- Vitamins B, C and D;
- Minerals e.g. potassium, iron, zinc.
- Boosts immunity, heart health, and lowers risk of cancer
