

OYSTER MUSHROOM HOME KIT

Download this guide here:

YOU WILL NEED

Spray bottle & clean water (not included)

Light cloth (included)

INCUBATION PHASE

Keep in the dark (in a drawer or in packaging box)
Do not open | No need to spray

7~14 days

(skip this step if substrate is all white already)

AFTER FULL COLONISATION

Once the tub is all white with mycelium, place in a well ventilated space with indirect daylight

Open and place lid at an angle

After opening, spray 2-3 times a day to keep moist

Spray on the substrate

Spray underside of lid

7~14 DAYS

When pins are seen, spray only around mushrooms

After harvest, replace lid & repeat, it will regenerate in 2 weeks for several fruitings if you look after them well!

Replace lid with cloth when grown over; keep moist & spraying

HARVESTING & COOKING

Harvest when caps are almost upturned

Pull from the bottom of the stem, it should come off cleanly

Remove any residue mushroom bits on the substrate using a clean spoon. Scrape off and discard any yellowing bits on the surface

Store in a breathable container with lid on for best storage. Keeps fresh for a week.

Oyster mushrooms have a nutty, earthy flavour and a crunchy texture.

They release umami compounds when heated, and are best sautéed in butter, stir-fried, roasted, or tempura-ed.

BULGOGI MUSHROOM NOODLES

1. Shred mushrooms with hand into smaller pieces and marinate in bulgogi sauce
2. Prepare shredded vegetables such as carrots, cucumber, and bean sprouts
3. Fry beaten eggs with herbs such as basil and rosemary, season well and chop into cubes
4. Fry mushrooms in pan, add water to release any sticking, add herbs such as thyme and basil
5. Make your favourite dry noodles, top with the mushrooms, eggs, vegetables, and serve with kimchi

THE ULTIMATE SUPERFOOD

- Mushrooms are high in protein, low in fat, rich in fibre, and provide all of your essential amino acids
- Packed with antioxidants and polysaccharides e.g. beta-glucan;
- Vitamins B, C and D;
- Minerals e.g. potassium, iron, zinc.
- Boosts immunity, heart health, and lowers risk of cancer
